Diablo build for modern operating systems

GitHub, Installing. SnapCraft. Linux-ORG-RU

Fedora Linux

Install DevilutionX on Fedora;

```
sudo dnf install snapd -y && sudo reboot now
sudo ln -s /var/lib/snapd/snap /snap && sudo snap install devilutionx -y &&
devilutionx && #https://bilge.ru/playground:devilutionx
```

Debian GNU/Linux or Raspberry Pi OS

Install DevilutionX on Debian or on Raspberry Pi:

```
sudo apt-get update -y && sudo apt-get upgrade -y && sudo apt-get install
snapd -y && sudo reboot now #https://bilge.ru/playground:devilutionx
sudo snap install snapd -y && sudo snap install devilutionx -y &&
devilutionx #https://bilge.ru/playground:devilutionx
```

After installing

After installing DevilutionX, copy the file diabdat.mpq from the Diablo game files to the following directory:

```
~/snap/devilutionx/common
```

org.diasurgical.devilutionx/files. For Russian voice support you need ru.mpq. v3. Please ensure that the filename is lowercase only.

Примечание: spawn.mpq – это shareware, от вамне нужен, если у вас есть DIABDAT.MPQ. Кроме того, не качайте fonts.mpq: он нужен только лишь для азиатских гарнитур.

macOS

Copy the MPQ files to the folder containing the DevilutionX application, or to the data folder. The data folder path may differ, but will normally be

```
~/Library/Application Support/diasurgical/devilution
```

Android

Play Market.

Open the device's internal storage, and navigate to

```
Android/data/org.diasurgical.devilutionx/files
```

, then copy the MPQ-files to this folder.

Another one

Free/Libre Action Roleplaying Engine.
