Прежде всего, подключим репозиторий `contrib`:

```
dragonserw@debian-pn41:~$ cat /etc/apt/sources.list

Установка пакета fheroes2:

fheroes2 Installation Guide: Debian and Ubuntu

```
sudo apt-get install -y fheroes2 game-data-packager innoextract # contrib!!!
```

1. Распакуем установщик GOG. Поддерживается только распаковка в корень.
2. При помощи GDP сделаем homm2*.deb-установщики для Дебиан.
3. Скопируем их в публичную директорию.

```
dragonserw@debian-pn41:~/Загрузки$ innoextract
setup_homm_2_gold_2.1_eng_win_gog_v2_\(83674\).exe
game-data-packager heroes2 ./
cp -ur homm2*.deb $HOME/Общедоступные/Playground/FHeroes2
```

Войдем в терминал администратора:

```
su -
```

Установим оба пакета:

```
root@debian-pn41:~# cd /home/dragonserw/Общедоступные/Playground/FHeroes2/
&& sudo dpkg -i homm2*.deb
```

```
cd /home/dragonserw/Public/Playground/FHeroes2/ && sudo dpkg -i homm2*.deb
```

Если после этого всего fheroes2 не стартует, выполните переустановку пакета `fheroes2`.

Google Drive /FHeroes2/.

macOS

```
cd ~/Public/Playground/FHeroes2 && innoextract
setup_heroes_of_might_and_magic_2_gold_1.01_(2.1)_(33438).exe
```

https://github.com/ihhub/fheroes2/blob/master/docs/INSTALL.md#homebrew-mac: If you have a legally purchased copy of the original game, copy the subdirectories ANIM, DATA, MAPS and MUSIC (some of them may be missing depending on the version of the original game) from the original game directory to the $XDG_DATA_HOME/fheroes2 (usually ~/.local/share/fheroes2) directory.

```
fheroes2-extract-resources
fheroes2-extract-resources
/Volumes/Ventoy/Playground/FHeroes2/setup_heroes_of_might_and_magic_2_gold_1
.01_\(2.1\)_\(33438\).exe
```
