Free/Libre Action Roleplaying Engine

Web. Tracker. Stable.

Flare is an open source, 2D action RPG licensed under the GPL3 license. Its game play can be likened to the games in the Diablo series.

While the core engine is written in C++ with SDL2, there is an easy to use modding interface. Using the modding interface, it’s possible to create entirely new games. On the Mods page, you can find games made by the Flare team, as well a few select community projects. For more information on creating your own mods, see the Modding section of the Get Involved page.

Альт Рабочая станция 11

```
apt-get install -y flare-game # https://bilge.ru/playground:flarerpg
```

Debian GNU/Linux

```
sudo apt-get install -y flare-game # https://bilge.ru/playground:flarerpg
```

Another one

Diablo build for modern operating systems.
